

Tensions of Europe & Inventing Europe Working Papers Series

The Tensions of Europe/Inventing Europe Working Papers Series has two related aims:

1. to provide an internet environment for the exchange of ideas and research findings among scholars in the Tensions of Europe Network and in the four projects funded through the ESF Collaborative Research Programme “Inventing Europe: Technology in the Making of Europe, 1850 to the Present”
2. to provide an internet platform for intellectual debate between Tensions of Europe/Inventing Europe and the broader intellectual and policy-making community.

The editors of the working papers series invite contributions from scholars participating in the Tensions of Europe network and the Inventing Europe program as well as from other scholars whose work addresses issues pertinent to Tensions of Europe/Inventing Europe. Criteria for accepting the paper include language, structure, and argument. Only papers with relation to Tensions of Europe and Inventing Europe agendas will be accepted. Project meeting reports and progress reports may also be published.

Instructions for authors

1. Working papers are to be published in electronic form. Papers should be submitted as Word (.doc) documents. After editing, editors will convert the document to PDF format for placement on the website.
2. Language of the series is primarily English, with optional co-publishing of the paper in another language.
3. Length of a working paper should not exceed ten thousand words
4. Recommendations for layout: use Arial, 11pt, single spacing. Please leave headers empty for ToE/IE working paper series information (Paper No. etc.)
5. Information about the author(s) will appear on the cover page and should contain name(s), contact information, project (if any), and major area of interest (in history of technology)
